

Global Facts: Employee Fraud

Of submitted resumes and job applications contain falsifications.

Primary Source Verification revealed that the global ratio for education degree forgery is 6%.

Only 40% of companies regularly verify education degrees.

At least 15% of all job applicants in business organizations fail to report criminal convictions.

Occupational fraud costs companies an average of 6% of their annual gross revenue.

Statistics on resume fraud are difficult to obtain because only a fraction of resumes are ever checked for discrepancies.

Senior managers remain the most likely fraudsters.

It takes an average of 3.4 years to detect fraud.

Lie about their work experience

Fabricate credentials or licenses

Lie about their education
